What was my game about?
My game was a drawing game where you can draw whatever you want by using your cursor.

What were my struggle/s?
At the start I didn't know what to do, then we discussed as a team and decided on a simple idea, to do a drawing game.

ATL skills that I used
ATL skills that I used is communication skills because I discussed with my team a lot and co operated with them, I used thinking skills because I thought a lot and used alot of brain for this Coding and ideas, and last I used inquiry skills because I inquired about coding.

What can I improve on for next time?
I can focus more on my work and I can make more complex and fun games in shorter period of time.
